

Pacesetter

24/7 Meter Series

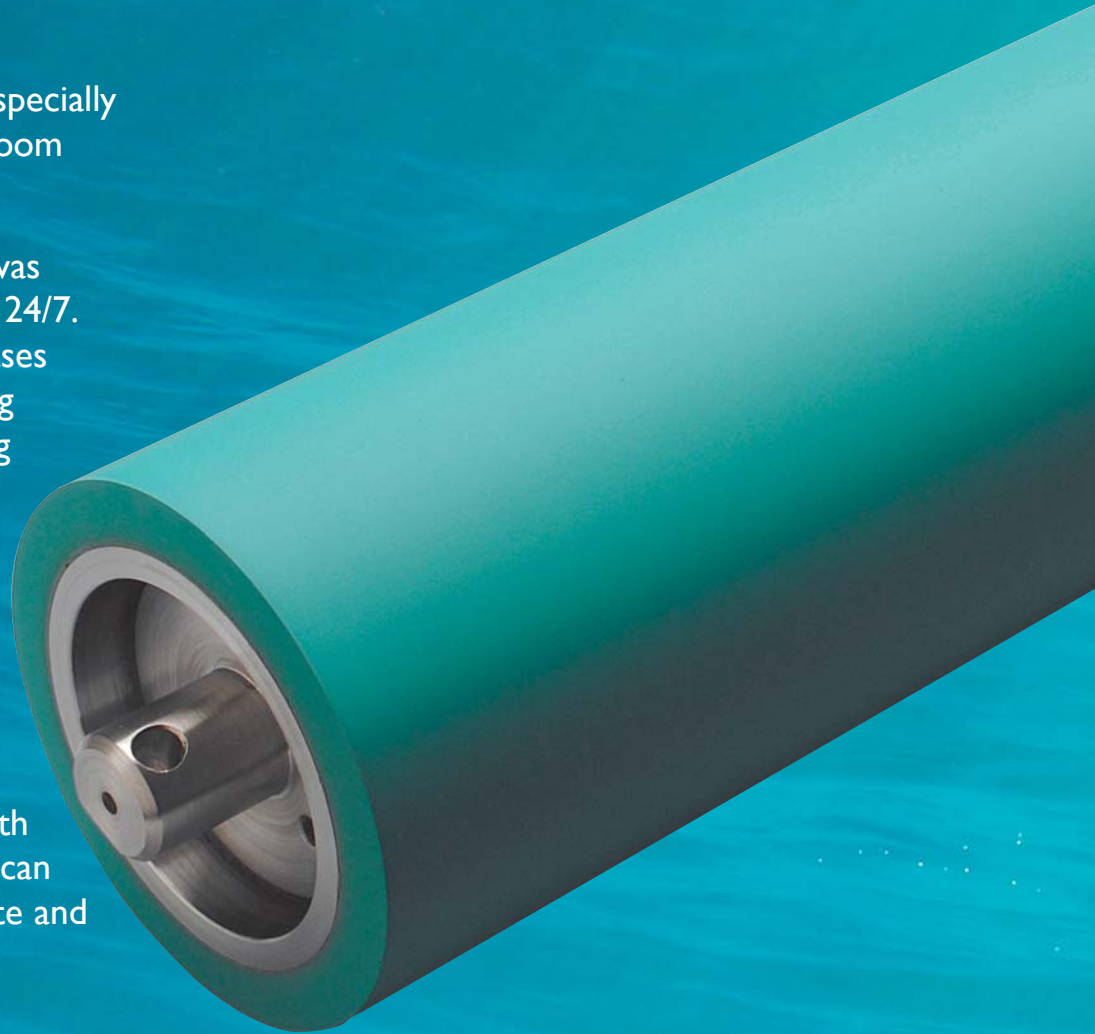

Why not improve your pressroom by using Pacesetter's 24/7 meter series?

A unique blend of Polymers specially formulated for today's pressroom environments.

The 24/7 meter compound was designed to stay in the press 24/7. The 24/7 water meter increases water pick-up, while providing unbelievable balance, ensuring great start ups.

With leading chemicals, lab tests show 24/7 is the industry leader in swell and shrink tests thus ensuring a true rolling meter.

Why chase water settings with tinting and toning, when you can feel safe 24/7? Stop high waste and long make-ready times 24/7!

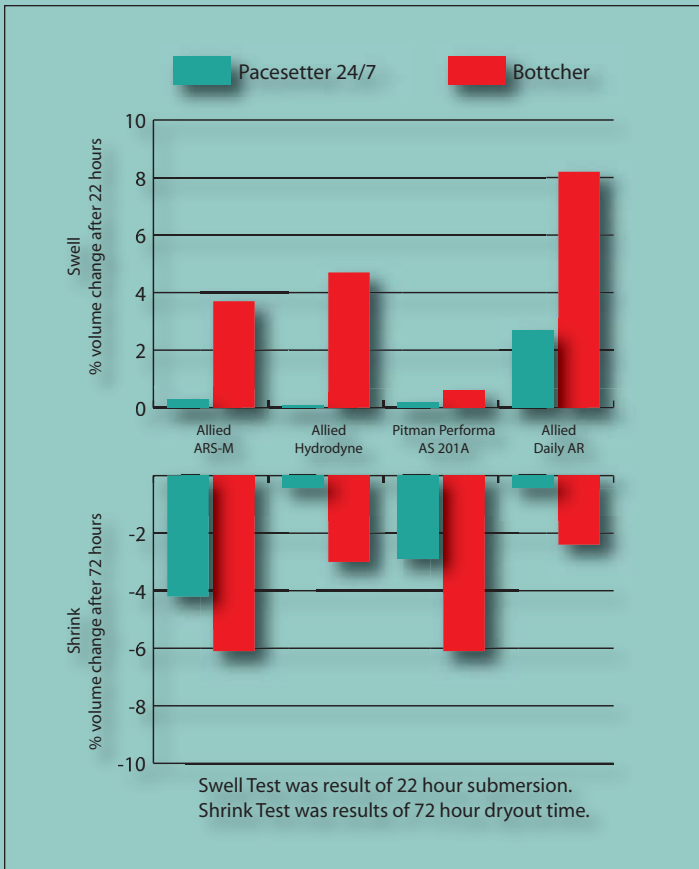

Pacesetter

24/7 Meter Series

Pressroom studies show multiple areas of absorption points (e.g. mushrooming) that cause shrink and swell with today's chemicals. With 24/7, Pacesetter formulated the perfect polymers that are unaffected by these chemicals. 24/7 gives you a true-rolling metering roller, which reduces downtime and waste to provide more efficient pressroom make-ready and extended run times.

Lab tests show that 24/7 is the leader in resistance to chemicals. Swell and shrink tests show that Pacesetter's 24/7 meter performed reliably when the competition failed. Tinting, toning, and water speeds improve when using Pacesetter's 24/7 meter. Experience quality and durability by installing a 24/7 meter today.
